

ABM Energy & Power Solutions

Generator solutions that keep critical operations running

Power disruptions are becoming more frequent, costly, and harder to predict. *ABM Energy & Power Solutions* delivers turnkey generator solutions that keep critical facilities operating when power matters most.

Backed by our nationwide Engineering, Procurement & Construction (EPC) capabilities, our customized resilient power systems reduce risk, improve operational continuity, and prepare your facility for the future.

A single-source partner

Our in-house EPC teams manage every phase of your project, including:

- Engineering
- Procurement
- Construction
- Commissioning
- Startup
- Ongoing maintenance and monitoring

Built for your business

ABM | RavenVolt customized generator solutions are designed specifically around your unique operational needs.

NATURAL GAS GENERATORS

Reliable standby and continuous power utilizing existing utility infrastructure where available.

TIER 4 FINAL DIESEL

Low-emission diesel power that also enables peak shaving, demand response, and energy cost optimization.

TIER 2 DIESEL

Cost-effective standby power where emissions regulations allow.

FUEL CELLS

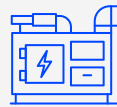

Efficient, lower-emission power generation supporting sustainability and energy resilience.

LINEAR GENERATORS

High-efficiency distributed generation with reduced maintenance requirements.

The ABM | RavenVolt advantage

ABM | RavenVolt creates energy strategies that protect your business today while preparing it for tomorrow.

**4 GW OF GENERATION
CAPACITY DEPLOYED**

**INTEGRATED
EPC EXPERTISE**

**NATIONWIDE
DELIVERY**

**END-TO-END
LIFECYCLE SUPPORT**

**FUTURE-READY
SOLUTIONS**

Resiliency starts here

Whether you're upgrading aging infrastructure, expanding operations, developing a microgrid, or improving business continuity, our experts can strengthen your critical power infrastructure.
