

POWER SERVICES

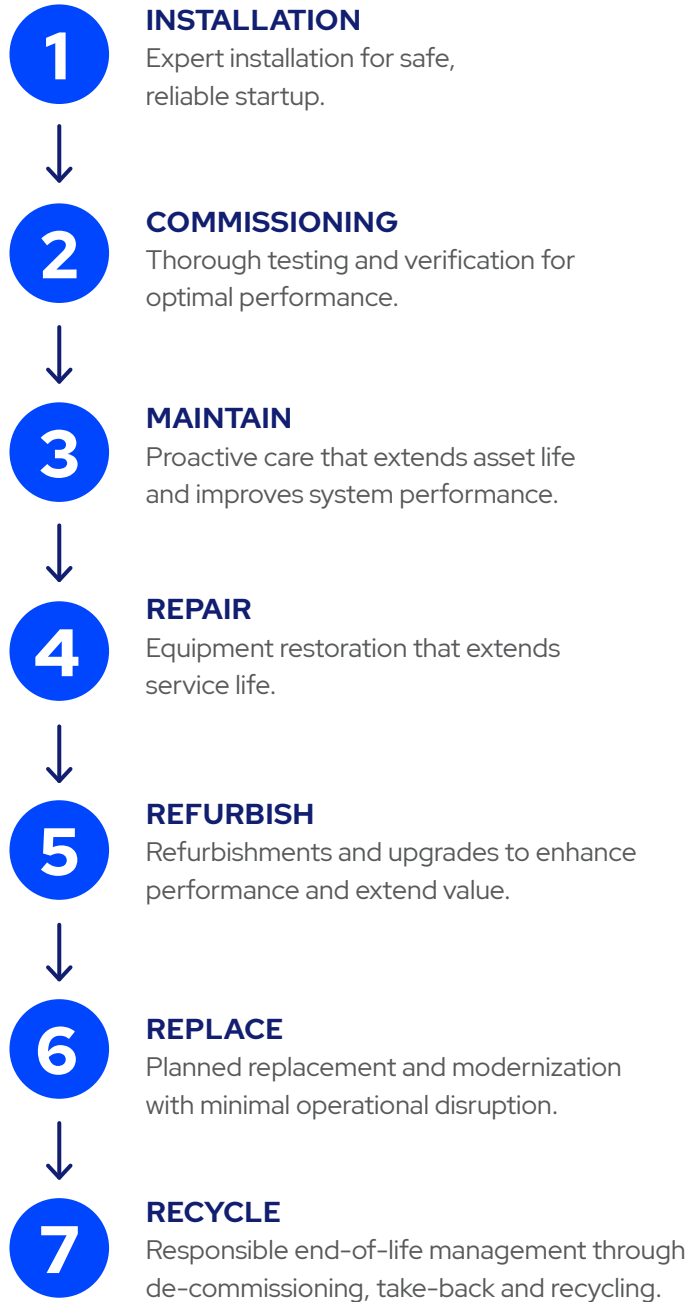

*Overview*

# One partner for every phase of your electrical equipment's lifecycle

From installation to responsible end-of-life, ABM maximizes the performance, reliability, and value of your electrical infrastructure. Whether you're extending the life of critical assets or planning for the next generation of electrical infrastructure, ABM's Power Services deliver end-to-end solutions.

# The ABM lifecycle approach

For every stage of the electrical equipment lifecycle, our Power Services provide:

Contact ABM today to review your assets and develop a lifecycle strategy by visiting [ABM.com/power](https://www.abm.com/power) or calling **866.624.1520**.

## Why choose ABM?

- Complete electrical equipment lifecycle support
- Improved reliability and reduced operational risk
- Proactive modernization and replacement planning
- Safe, compliant end-of-life management
- Nationwide electrical expertise and execution

Don't wait for a failure to force your hand. The longer aging electrical equipment stays in service without a plan, the greater the risk to safety, uptime, and cost. ABM helps you get ahead of it with a lifecycle strategy built around your infrastructure, your timeline, and your goals.
