

A photograph of two ABM technicians in a warehouse. A woman on the left is wearing a light blue shirt, a high-visibility yellow safety vest with the ABM logo, and glasses. She is holding a tablet and looking upwards. A man on the right is wearing a dark blue t-shirt, a high-visibility yellow safety vest with the ABM logo, and glasses. He is also looking upwards. The background shows warehouse shelving and a blue floor. A large blue and orange diagonal graphic is overlaid on the left side of the image.

Industrial Operations & Maintenance

ABM is the ideal partner on-site at logistics and distribution centers.

ABM partners with you to deliver skilled technicians who safeguard uptime and allow your team to stay focused on core business priorities. We work as an extension of your operations, ensuring your facility systems are proactively maintained to elevate performance, enhance reliability, and add long-term value. Our rigorous safety standards and proven practices protect people and assets.

General Maintenance Technician

ABM provides maintenance technicians specialized in supporting the unique needs of distribution and logistics environments, including today's automated facilities. Our teams help keep critical distribution systems running at peak efficiency.

- Cleaning under conveyance
- Cleaning out belly pans and netting
- Adjusting photo eye sensors
- Swapping out conveyance rollers
- Changing bands and belts on conveyance
- Swapping out programmable logic controllers (PLCs)
- Installing/repairing machine guarding
- Maintaining automated storage and retrieval systems
- Torquing and adjusting to desired specifications

Safety training requirements are tailored to the work environment and client needs. Training includes but is not limited to:

- Lockout/tagout (LOTO)
- Pinch points
- Working in confined spaces
- Stored energy
- Energy isolation
- Hierarchy of controls
- Working at heights
