

ABM POWER SERVICES

Electrical commissioning for critical power systems

Commissioning is where project risk becomes operational confidence

Before a facility goes live, owners need more than installed equipment. They need confidence that critical electrical systems have been tested, verified, coordinated, documented, and are ready to perform under real operating conditions. Gaps discovered during energization can create rework, delay occupancy, increase costs, and introduce risk at the exact moment a project is expected to perform.

ABM Power Services brings commissioning expertise, field execution, and lifecycle electrical support together to help customers identify issues earlier, streamline startup, verify system performance, and transition to operations with a documented baseline for long-term reliability.

What clients gain

1 REDUCE PROJECT RISK

Identify installation and performance issues before they become costly operational problems.

2 ACCELERATE OPERATIONAL READINESS

Coordinate testing, startup, issue resolution, and turnover to help projects reach operation faster.

3 IMPROVE SYSTEM RELIABILITY

Verify critical electrical systems perform as intended to support uptime, resilience, and equipment longevity.

4 BUILD A FOUNDATION FOR LONG-TERM PERFORMANCE

Deliver testing results, settings, deficiencies, and documentation that support maintenance and future decision-making.

CAPABILITIES THAT SPAN THE FULL INFRASTRUCTURE LIFECYCLE

DESIGN → BUILD → COMMISSION → OPERATE → MAINTAIN → MODERNIZE

FACILITY
ENGINEERING &
INFRASTRUCTURE
SOLUTIONS

ABM drives possibility through facility, engineering, and infrastructure solutions across a wide range of industries. Our inclusive teams work together to advance a healthier, more sustainable, ever-changing world. Under our care, systems perform, businesses prosper, and occupants thrive. Every day, over 100,000 of us work together with our clients to care for the people, places, and spaces important to you. We are making spaces smarter, modernizing infrastructure, and transforming facilities to become more resilient.

Driving possibility, together.
