

ABM Acquires Quality Uptime Services

A partnership to power better data center service

The combined expertise of ABM and Quality Uptime Services significantly enhances the quality and scope of services we offer to our clients. ABM brings over 30 years of experience in electrical and mechanical preventive maintenance services, including comprehensive operations and maintenance programs across SCADA/DCIM, controls, and life safety systems. With a nationwide network of skilled electricians, ABM can install, repair, and maintain electrical infrastructure from switchgear to transformer and utility feed.

Complementing this, Quality Uptime Services provides over 20 years of industry-leading experience in OEM-agnostic UPS preventive maintenance, conducting annual, semi-annual, and installed base of batteries and capacitors, ensuring timely replacements and optimal performance.

Together, our combined expertise ensures unparalleled reliability, efficiency, and comprehensive support for our clients' critical infrastructures. Our single point of contact simplifies communication and team structure for complex technical programs, assessments, and deployments. This holistic approach allows ABM to deliver reliability and efficiency while lowering risk by considering power, HVAC and mechanical systems, and fire suppression.

**30+ Years of critical
facility experience**

**4,000+ MW of data
center capacity managed**

**150+ NETA
certified technician**

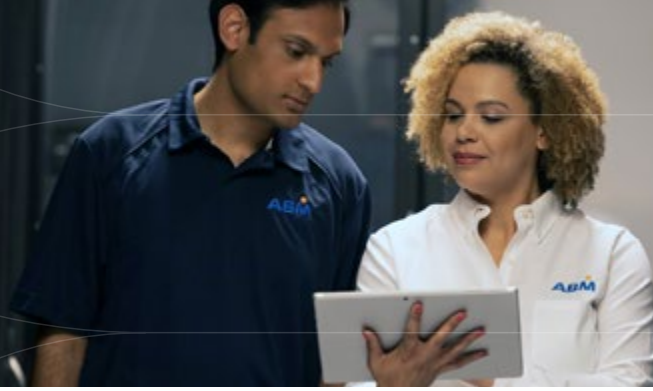

**US government
security clearance**

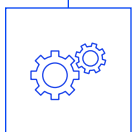

**75+ additional UPS
technicians on-staff**

ABM and Quality Uptime Services

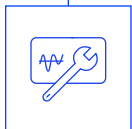

Smarter solutions for your mission critical ecosystem

- Comprehensive support
- Facility management
- Project management

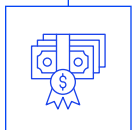

Streamline your operations and maintenance services

- Structured services
- Managed services
- Facility operations
- Team certifications

Protect your infrastructure with preventative expertise

- Project installation and management
- Electrical services
- HVAC & mechanical services
- Fire suppression services

Generate savings through energy efficiency

- Meeting your safety, compliance and regulatory requirements
- Providing a safer work environment that helps prevent accidents and protect employees
- Mitigating and managing your operational risk
- Fire suppression services

ABM's expertise

- Electrical infrastructure maintained by NETA-certified maintenance
 - Switchgear and electrical testing
- Life safety services
- HVAC & Mechanical
 - Chiller plants
 - High-density cooling systems
 - Process loop systems
- Janitorial and technical cleaning

Quality Uptime Services' expertise

- UPS and battery maintenance for all OEMs
- UPS replacement
- Emergency UPS services
- Battery and capacitor replacement
- Enhanced services
 - Static Transfer Switches
 - Power Distribution Units
 - Data Center Power Plants

Benefits of our Mission Critical partnership

Our partnership offers numerous benefits for our clients. We help prevent unexpected failures and increase power usage efficiency, ensuring smooth operations. Our services are designed to cost-effectively minimize disruptions while ensuring that all equipment operates at the highest industry standards. We also mitigate noncompliance and safety risks, reducing operating expenses and enhancing overall security.
