

# Formulating Success

Keeping your production facilities  
and cleanrooms compliant, efficient,  
and safe with tailored service solutions

# The breakthrough in best practices

**Laboratories, research facilities and MHRA-regulated companies face challenges due to non-compliance and service deviations. But ABM can help your facility run smoothly.**

Our cleanroom professionals are trained to take the utmost care, and we pay special attention to the cleanliness of your research and product development labs.

You can also benefit by integrating our other services – technical maintenance, electrical, lighting, EV turnkey solutions, and more. We apply best practices to design a custom programme according to your budget. You can look to us for help achieving new levels of success.

# Our training + your training =

Team members who understand your facility's regulations and strict protocols, measurements and emergency procedures

ABM team members across the UK and Ireland

700+

Technical solutions team members operate throughout the UK and Ireland

*“By ABM meeting the diversity spend, we surpassed our annual corporate diversity goals.”*

– MULTI-SITE PHARMACEUTICAL MANUFACTURER

# 5 reasons to partner with ABM

## 1. INDUSTRY EXPERTISE

For over 20 years, we have served pharmaceutical, biotech and medical device facilities around the world, including corporate headquarters, Good Manufacturing Practice (GMP) production, Good Laboratory Practice (GLP), Research and Development (R&D) and GMP distribution centres.

## 2. COST CONTROL

ABM's management techniques and technology ensure more precise budget projections and quality control, reduce operating manpower, and free up cash for increasing rent and R&D costs.

## 3. ENERGY EFFICIENCY AND MANAGEMENT

We incorporate sustainable practices in all we do. From energy efficient building and lighting upgrades to green cleaning products and recycling programmes, we support sustainability goals while ensuring peak performance.

## 4. COMPLIANCE MANAGEMENT

ABM maintains a formal Risk Management Department with a certified staff of specialists in workers' compensation, liability claims and insurance management, in order to ensure a safe environment in your facility. Additionally, our experience servicing a variety of controlled environments allows us to meet regulatory guidelines. We specialise in cleaning macro and microscopically to protect your tools and equipment from air and surface contamination.

## 5. MULTI-SITE, MULTI-SERVICE SOLUTIONS

Whether you have one site or many, ABM is there providing consistent service. You won't have to manage multiple vendors – we offer complete facility services, with a single point of contact.

## CLEANING

# Compliance and certification

Your business will benefit from ABM's expertise and services, including:

- Cleaning, general and cleanroom maintenance.
- Contamination control, Class 1 to Class 10,000.
- Filtering systems and other specialised equipment for manufacturing plants.
- Team members trained in full compliance with GMP, GLP and all other cleaning requirements. We will partner with you to provide any additional training per your standard operating procedures.

You can be assured of a workforce that has the knowledge, training and skill sets to provide a consistent, compliant service programme. As appropriate, critical management will be certified by a third party. We'll put customised educational programmes in place for continuous internal certification of site service employees.

Being "Best in Class" is no simple feat.  
**ABM can help.**

# Expertise that pays off

ABM clients around the world have won multiple awards for cleaning programmes in competition with other pharmaceutical companies. Our services include both non-GMP and GMP cleaning and sanitisation.

Your protocols for change control, deviation control and corrective and preventive action (CAPA) will be adhered to. Our supervisors will perform investigations and write ups as needed, and ABM management verifies all proscribed follow-up actions. Through ABM technology, you will be able to monitor and participate in our inspection systems.

ABM's success in helping facilities thrive will pay off for you in increased quality and productivity.

Find out how ABM can help your facility find the formula for greater success. Visit [ABM.co.uk](https://ABM.co.uk) to learn more or contact us at [Solutions@ABM.com](mailto:Solutions@ABM.com).

## FACILITY ENGINEERING & MAINTENANCE

### SOLUTIONS

ABM drives possibility through facility and engineering and maintenance across a wide range of industries. Our diverse, inclusive teams work together to advance a healthier, more sustainable, ever-changing world. Under our care, systems perform, businesses prosper, and occupants thrive. Every day, over 12,000 of us partner with our clients to care for the people, places, and spaces important to you. We are making spaces smarter, modernising infrastructure, and transforming facilities to become more resilient.

Driving possibility, together.
