

# New Cool Solutions

Increase efficiency and eliminate waste

**Facing regulatory hurdles, labor shortages, and economic pressures? ABM has your back.**

Distributors rely on ABM to deliver the team, technology, and techniques they need to keep their cold storage operations running smoothly and their facilities efficient—without disruption to their day-to-day workflow.

### Keeping perishables fresh

ABM provides a customized life cycle assessment, ongoing testing of your equipment, and protocols to identify opportunities for modernization and replacement. We implement the highest standards including NFPA 70e & 70b, NETA and OEM requirements, and measure performance with complex protective relay systems to provide proactive maintenance and engineering.

### Experts in cold storage—across facilities

Unlike other service providers that might excel in only a few areas, ABM delivers expertise across the board, including sanitation, production support and energy solutions. We've been servicing these specialized industries for over 50 years, that's why manufacturers and distributors can count on ABM to deliver operational efficiencies and optimization.

### Reduce cold storage damage

Our cold storage cleaning and maintenance experts identify vulnerabilities, enhance efficiency, and improve safety, reducing spoilage and damage rate and protecting your bottom line with our power services, minimizing the need for product replacements.

## Cold Storage Services

- Equipment inspection and maintenance
- Temperature monitoring and calibration
- Ripe storage services
- Refrigerant management
- Indoor Air Quality (IAQ) control
- Coil cleaning
- Electrical asset management program
- Rack, surface, slot, and spill cleaning
- Ice/frost/mold prevention services

### *Additional Services*

- Electrical, engineering, and lighting
- Sanitation (GMP cleaning)
- Energy solutions
- Janitorial and waste management
- Corrugate and pallet management
